THIS IS UNEVALUATED INFORMATION 3 The Rumanian Government has made some concessions to the miners in the Petrila and Petrosani areas who have returned to their work. The Covernment has sent some recently inducted men (peasents) from the Army to work in these mines. The postal and railroad employees are very discontent because of their poor wages and meager food. A large number of these employees have presented themselves to the medical clinics and most of them have asthenia and pronounced anemia. The General Confederation of Labor has issued a secret order to the medical climics not to tell the person his exact red corpuscle count. Seldom do any of the people who come to these clinics have more than a count of 3,000,000 red corpuscles. A normal amount would be 4,500,000 - 5,000,000 red corpuscles.
